

EDUCATION

Sri Eshwar College of Engineering	B.E(CSE)	CGPA 7.87 (upto 3rd semester)	2022 - 2026
RGM Hr.Sec.School	HSC	73.5%	2020 - 2022
Kalaimagal Matric.Hr.Sec.School	SSLC	66.2%	2019 - 2020

INTERNSHIPS

MERN STACK - BETTER TOMORROW 2024

I designed a Mobile E-Commerce Web Application featuring robust cookie-based validation. This system securely stores critical user data, such as user type, for Backend validation. The application ensures seamless authentication and enhances user experience with tailored access. By leveraging cookies, it offers both security and personalized interactions.

Tech Stack: React js, Node js, Express js, MongoDB

FULL STACK – OCTANET 2023

Crafted user-friendly to-do lists and captivating landing pages during the Octanet internship, by showcasing coding proficiency and problem-solving skills through dynamic web projects. Developed intuitive interfaces that enhance user experience and engagement. Utilized HTML, CSS, and JavaScript to build responsive and visually appealing components.

Tech Stack: HTML, CSS, Javascript

PROJECTS

MOBILE E-COMMERCE SITE 2024

Our platform, built with React JS, delivers a visually stunning and highly responsive interface for effortless mobile shopping. It features intuitive navigation, personalized recommendations, and powerful product filtering, all designed to elevate user engagement. The platform streamlines the checkout process, ensuring a smooth and efficient experience. With advanced front-end capabilities, it offers a modern and dynamic shopping environment.

Tech stack: MongoDB, Express.js, Node.js, React.js

TASK MANAGEMENT SYSTEM 2024

The task management system using JavaFX is a software application designed for efficient task organization and tracking. This system facilitates the creation, management, and monitoring of tasks, enabling the prioritization of work, setting of deadlines, and tracking of progress. JavaFX provides a rich client-side experience, offering an intuitive and interactive interface for managing tasks.

Tech stack: JavaFX, Scene Builder, MongoDB

JARVIS - THE VOICE ASSISTANCE 2023

Jarvis Voice Assistant is a Python project that uses speech recognition and natural language processing to perform tasks, answer queries, and control devices, mimicking the virtual assistant concept inspired by Iron. It is user friendly and assist the user to do their task and makes the tasks more easier.

Tech stack: Python

HOSPITAL MANAGEMENT SCHEDULER 2023

The Hospital Management Scheduler, developed with JavaFX, serves as a centralized system for efficiently managing appointments, resources, patient records, and tasks. This comprehensive solution streamlines workflow and organization within healthcare environments, optimizing hospital operations for enhanced efficiency and productivity.

Tech stack : JavaFX, Mysql

CERTIFICATIONS

Certified in Mastering Java concurrency and MultiThreading	Scalar	2024
Became certified in Java Programming Beginner to Master	Udemy	2023
Attained Certification in Mastering Data Structure in C and C++	Udemy	2023
Certified in Python Fundamentals for Beginners	GreatLearning	2022

ACHIEVEMENTS

LeetCode - Solved 80 problems | Max Rating - 1529 | [Profile Link](#)

CodeChef - Solved 300 problems | Max Rating - 1067 | 1 Star Coder | [Profile Link](#)

Hackerrank - Rating – Bronze Badge in java | [Profile Link](#)

BreakingBug - Shortlist for Final round in Breaking Bug by IEEE CS MUJ 2024

InnoHacks - One of the top 10 teams in InnoHacks by PSG College Of Technology 2024

EY Technothon - Participated in EY Technothon 4.0 by EY Company 2024

FlipKart Grid 5.0 - Participated in Flipkart GRiD 5.0 - Health Track competition 2023

SKILLS

Languages	C, Java, Python, HTML, CSS, Javascript
Framework/Libraries	ReactJS, NodeJS, Tailwind CSS, JavaFx
Tools	Canva, VS Code, PowerBI, Tableau
Platform	GitHub, IntelliJ IDEA
Database	MySQL, MongoDB
